In 1844 he was promoted to engineer. He ran an engine on this road until 1851, when he came to the Terre Haute & Richmond, the predecessor of the Vandalia system. The road was not completed from here to Indianapolis at the time, and on March 4, 1852, he took the first regular train over the line. In 1870 he left the cab and accepted employment in

May Oust Receivers.

W. C. Green, of the firm of Alexander & Green, the New York attorneys for the reorganization committee of the Kansas City, Pittsburg & Gulf Railroad, arrived in Kansas City yesterday. Mr. Green's mission is said to be to confer with Mr. Hagerman regarding steps to be taken to oust the present receivers and secure the appointment of new ones who will represent the Eastern interests in the property. A move will be made in the courts, it is alleged, so soon as the papers can be prepared. Application will be made to set aside the decree of Judge Gibson, naming Mr. Martin, Mr. Gillham and Mr. J. McD. Trimble as receivers and petitioning for the appointment of new ones. The battle for the possession of the property promises to be a bitter one and will undoubtedly be fought out in the Federal Court. The Stillwell interests are now in control, through their clever coup of Saturday night, and they will undoubtly fight desperately to retain their advan-

Travelers from New Orleans, Memphis and other Southern cities coming to New York will be given the opportunity to come through Chicago at the same rates as are made to the short lines to the East from these points. The Grant Trunk has given notice that it will apply short-line rates from that territory through Chicago to all points in the East. Similar rates have been made for some time from Arkansas and Texas, via New Orleans, St. Louis and Chicago, while such places as New Orleans and Memphis, through which the business of the river is brought, have been denied a similar concession. The action of the Grand Trunk will, it is admitted, remove a discrimination against New Orleans and other points and

> Stock trading yesterday was very sensitive and moved irregularly. After a wild and high opening for many stocks, realizations of active interests and depressing efforts on the part of professionals tended to produce recessions, particularly in the active specialties which, of late, have attained the largest advances. The traffic agreement between Third-avenue and Manhattan produced a large advance in both of these properties at the opening, Third-avenue rising 6 and Manhattan 3 points. This brought about extensive realizing and the stocks gradually receded. Third-avenue losing 8 on the day and Manhattan half as much. Metropolitan lost 31/2, although at one time it was down 91/2 on liquidation induced on the combination of the rival companies. Talk of brisker business in the trade war left Sugar 6 points down. The suit to restrain the Brooklyn Transit from leasing a former rival traction company, together with realizing on Brooklyn Transit's large advance, caused the stock to ease off 3 points. The Iron and Steel shares ended irregularly, with Federal and American Wire down sharply. International paper lost 4 and Chicago Gas 3. Excepting the coalers, which rose, in some cases, materially, the general railway list showed little changes, the grangers being fractionally off. Among the specialties to display strength were Rubber, Tin Plate, Leather preferred, Continental Tobacco and Long Island, the two last-named rising 3 and 4 points respectively. An advance in plug tobacco prices was said to be a reason for the rise in Continental Tobacco. There was a confusion of views on the Stock Exchange. Traders were inclined to make much of crop prospects, the advices from the grain regions being mixed, as usual, at this season of the year. The impression was rather general that much liquidation had come from active interests, but there was no certainty but that part of their former holdings had been repurchased at a lower level. Uncertainty as to the immediate position of large speculative interests was a cause of some of the commission-house selling. In some quarters, however, stocks were still tenaciously held. Call money continued firm and ranged from 3 to 6, with most of the business at the higher figure. The dealings for the day exceeded a million shares and

Home-Grown Nursery Stock To the Editor of the Indianapolis Journal:

There appeared in Monday's Journal a letter from Mr. John Coburn, in which he copies a report of the Bureau of Statistics concerning orchards, nurseries, etc., in this State, and comments on the scarcity of nurseries and nursery stock, and says there is not one large nursery in Indiana. I wish to state for Mr. Coburn's benefit and others who are in need of information and have been sending out of the State for their trees and plants, paying high prices for them, that in the western part of this county is located the largest nursery in the State, and one of the largest in the West. They have nearly four hundred acres under cultivation, and any kind of a tree or plant may be found there that can be grown in this climate. Mr. Coburn says many persons wonder why we have none of those fine old varieties once produced here in abundance, and names Early Harvest, yellow Bellflower, Rambo and several other old varieties. The reason is this: the trees which produce the varieties named are all tender and the severe winters of recent years have killed or injured the bearing trees, and for the same reason it i impossible to grow them successfully in the nursery. After the severe winter of 1884 or 1885 I remember seeing thousands of those tender varieties dug and burned that had been injured by the cold in the nursery rows. We should not be discouraged, however, when we have such varieties as yellow Transparent, Grimes's Golden, York Imperial, Stark and many others to take their places. The trees are perfectly hardy, can be grown successfully in this climate, and the fruit (laying all prejudice aside) will give as good satisfaction as the old varieties. All these varieties and many others may be had here at home, and there is no need of sending to other States for trees and plants and getting inferior and diseased stock. Indianapolis, April 4. W. L. HOBBS.
